A BUG'S LIFE

Stage Select

At the "Flik's Journey" screen, hold C▲ and press the **R** button. Now point the analog joystick to the **Right** and you'll see that the entire game has been unlocked, allowing you to start at any stage.

AERO GAUGE

Extra Tracks & Vehicles

Note: You need two controllers to input this code, and it can be difficult to get the timing right, so if it doesn't work the first time, try again. First, turn the game on and hold **L** + **R** + **Z** on Controller 2. When the title screen appears with the words "Push Start" flashing in red, quickly tap **Up** on the D-pad and the C▼ button at exactly the same time (also on Controller 2); you must also be sure to release those two buttons at exactly the same time. Finally, press **START** or **A** on Controller 1 before the title screen disappears. If you've entered the code correctly, you should see two new courses at the track-select screen and five new vehicles to choose from, including one that's shaped like a Nintendo 64 controller. Press the **R** button repeatedly at the vehicle select screen to change the color of the N64 controller to red, green, blue, black or yellow.

Turbo Start

At the starting line, hold the **A** and **B** buttons. When the announcer says, "Set, Ready, GO!" release the **B** button just before he says "GO!" This gives you a speed boost at the start of the race.

Turbo Boost

During a race, hold the **A** button to accelerate, hold **Z** and point the joystick hard **Left** or **Right**, then release both buttons and quickly press **A** again. This is a difficult trick to perform, but if you do it successfully, you'll hear a sound and you'll get a burst of speed.

AEROFIGHTERS ASSAULT

Stage Select

When you turn the game on, wait for the Video System and Paradigm Entertainment logos to disappear, then enter the following code as soon as you see the planes flying in the introduction sequence: **Up, C▼, Left, C▶, Down, C▲, Right, C◀, L, R, Z**. You'll hear a sound to confirm that the code has been entered correctly. Next, choose "Main Game" from the Game Mode menu; a stage select menu will appear, allowing you to practice any stage. The save options are deactivated when this code is in place, so your regular game scores won't be affected.

Secret Character: Mao Mao

Wait for the words "Press Start Button" to appear on the title screen, then press C◀, C▼, C▶, C▲, C◀, C▶, C▼. At the "Pilot Select" screen, you'll find a new character called Mao Mao who pilots an F-15. Note: You may have already gained access to Mao Mao if you continued more than three times in the Tokyo stage.

Secret Character: Spanky

To access another secret character, you must complete the following requirements:

1) Earn more than 170,000 points by the end of the Pacific Ocean stage; this will allow you to play the first bonus stage, "Air Landing".

2) Clear the Tokyo, Pacific Ocean and Air Battle stages in less than 1,400 seconds; this will allow you to play the Desert stage during daytime.

3) If you clear the daytime Desert stage, you'll access the second bonus stage, "Shuttle Defense."

4) If you clear the "Air Landing" and "Shuttle Defense" bonus stages, you'll enter the third bonus stage, "Goliath Defense," after the Fortress level.

5) If you clear the "Goliath Defense" bonus stage, you'll enter the fourth bonus stage, "Space," after the Antarctic Ocean and Ice Cave levels.

6) If you clear the "Space" bonus stage, you'll be able to access Spanky, an X-29 pilot.

BANJO-KAZOOIE

Secret Codes

Each of the following codes can be entered on the floor of the Puzzle Room inside the sand castle in the Treasure Trove Cove stage; just plop some eggs into Leaky the bucket so he'll drain the pond and you can walk inside. Use the Beak Buster move on the lettered tiles to spell out the code words as follows:

- Enter "CHEATLOTSOFGOESWITHMANYBANJOS" to earn infinite lives.
- Enter "CHEATANENERGYBARTOGETYOUFAR" to max out the capacity of your energy bar at eight honeycomb pieces.
- Enter "CHEATDONTBEADUMBOGOSEEMUMBO" to earn infinite Mumbo Tokens.
- Enter "CHEATNOWYOUCANFLYHIGHINTHESKY" to earn infinite red feathers.
- Enter "CHEATAGOLDENGLOWTOPROTECTBANJO" to earn infinite gold feathers.
- Enter "CHEATGIVETHEBEARLOTSOFAIR" to have infinite air when underwater.
- Enter "CHEATBANJOBEGSFORPLENTYOFEGGS" to earn infinite eggs.

For each code, you will hear a "Moo!" sound when you enter the first five letters; if you do not hear the "Moo!" during the first five letters, exit the sandcastle and go back in. You will not hear any special sounds when you enter the remaining letters of each code, so take your time and aim carefully.

Bottles' Bonus Codes

Enter Banjo's house, stand on the yellow lines on the carpet directly in front of the fireplace, then press the **C▲** button to enter the first-person camera view. Now look directly at the picture of Bottles on the wall; Bottles will give you a puzzle to solve. If you solve the puzzle, he will reward you with a secret code which you can enter in the sand castle in Treasure Trove Cove (as described above under "Secret Codes"). Note: Bottles will not allow you to access the puzzles until you have obtained the puzzle piece from the sand castle. There are seven codes available if you can solve all of the puzzles. IMPORTANT: The codes are listed below for reference only; they will not work unless you actually earn them by beating the puzzles that release the codes.

- Enter "BOTTLESBONUSONE" to give Banjo a big head.
- Enter "BOTTLESBONUSTWO" to give Banjo big hands and feet.
- Enter "BOTTLESBONUSTHREE" to make Kazooie big.
- Enter "BOTTLESBONUSFOUR" to make Banjo tall and thin.
- Enter "BOTTLESBONUSFIVE" to get a tall, thin Banjo with big hands and feet.
- Enter "BIGBOTTLESBONUS" to activate all of the above codes at once.
- Enter "WISHYWASHYBANJO" to change Banjo into a washing machine.
- Enter "NOBONUS" to deactivate all active codes.

BANJO-TOOIE

Cheat Codes

As you locate the Cheato Pages in the game and return them to Cheato, he will give you codes that you can enter by shooting eggs at the letters on the wall in the Code Chamber to spell the words. However, each of the codes that he gives you will not work until after he has told you about it. The following codes can be entered at any time after you've cracked open the Code Chamber, including six codes that have the same results as the ones that Cheato and Madame Grunty give you and several new ones. Once you've entered a code, check out the sign on the wall to the right of the letter board to turn each cheat on or off.

CHEATOSREHTAEF—This code has the same effect as Cheato's "FEATHERS" code; it doubles the maximum amount of feathers that you can carry.

CHEATOSGGE—This code has the same effect as Cheato's "EGGS" code; it doubles the maximum amount of eggs that you can carry.

CHEATOFOORPLLAF—This code has the same effect as Cheato's "FALLPROOF" code; it allows you to fall from any height without losing energy.

CHEATOKCABYENOH—This code has the same effect as Cheato's "HONEYBACK" code; it causes your energy meter to slowly regenerate.

CHEATOXOBEKUJ—This code has the same effect as Cheato's "JUKEBOX" code; it allows you to listen to any of the game's music tracks by accessing the jukebox in Jolly's Inn at Jolly Roger's Lagoon.

CHEATOYGGIJTEG—This code has the same effect as Madame Grunty's "GETJIGGY" code; it activates the signs in Master Jiggywiggy's temple that tell you where the jiggies are located in each stage.

CHEATOSUPERBANJO—With this code in place, both Banjo and Kazooie will run much faster.

CHEATOSUPERBADDY—Activate this code to make the game more challenging by speeding up all of the enemies.

CHEATOHONEYKING—Enter this cheat to completely disable the honeycomb meter and air meter; now you're invincible and can stay underwater or in toxic areas for as long as you want.

CHEATONESTKING—This cheat gives you unlimited eggs and feathers; your inventory will show that you have "LOTS" of every type.

CHEATOJIGGYWIGGYSPECIAL—This code unlocks all of the doors in the Isle O' Hags area, giving you access to all levels.

CHEATOGNIMOH—This code has the same effect as the "HOMING" code that you get from having Heggy hatch the pink egg; it improves your aim when firing eggs by causing them to change direction and curve toward any nearby enemy.

The remaining two cheats will not cause new menu items to appear on the wall in the code chamber; once you have entered them, their results will immediately become effective and will remain in place.

CHEATOCASTLIST—Unlocks a new option called "Character Parade" at the Cinema menu in Replay mode; this option is normally unlocked by collecting 90 jiggies. Note that this code will not work if you have already found 90 jiggies in any one of the three saved game slots; it also will not register if you have already entered the following code...

CHEATOPLAYITAGAINSON—Unlocks all of the items in Replay mode, including the "Character Parade" movie mentioned above.

At the Cheat Options menu, you can toggle each individual cheat on or off once the cheat has been unlocked. You can also enter these codes at the Cheat Options menu itself, but you won't see the new menu items appear until you back out to the previous screen, then go back into Cheat Options.

Unlock Bonus Cars

To access the two locked garages, you must beat each track in Championship mode to gain access to Match Mode, then race in Match Mode and defeat both the Hannya and the Dues cars. If you don't want to take the time to do this, you can access both cars with the following trick. Plug in two controllers and access "Vs. Race" mode. Choose "Machine", then—when the car select screen appears—highlight one of the locked garages and press **B**; the word "Selected" will appear to confirm your choice. Both players can choose the Hannya or Dues in this mode, even better, if you use this trick to choose one of the "locked" garages for Player 1, then exit "Vs. Race" mode after leaving the car select screen, you can choose "Championship", "Time Trial" or "Free Run" mode from the main menu and the Hannya or Dues you chose in "Vs. Race" mode will still be selected.

- Non-Blur Mode—**B, Left, Right, Up, Left, Z, Right**. This code turns off the N64's "bilinear filtering" effects, making the graphics appear to be more "pixelated."
- ZBuffer Mode—**C▼, Z, B, Up, Up, Right** The ZBuffer is used by the N64 to determine if a pixel that is about to be drawn is in front or behind the pixel already on the screen. This buffer is exactly the same size as the buffer that contains the color information for each pixel When you enter this cheat, the N64 continuously copies the current ZBuffer data into the color data, and the result is a freaky mess of colors on the screen. Enter the code again to turn ZBuffer Mode off.

WAVE RACE 64

Ride the Dolphin

Enter Stunt Mode and choose the Dolphin Park course. Now perform all of the possible stunts (handstand, ride backwards, stand up, somersault, vertical flip off a ramp, barrel roll off a ramp clockwise and counter-clockwise and submarine dive off a ramp), go through all of the rings and finish the course before the timer expires. The easiest way to accomplish this difficult task is to do all of the non-ramp stunts at the beginning of the course, before you reach the ramps; you can even do one stunt—like the stand and somersault—before you cross the starting line and you should still have enough time to reach the first checkpoint. There are only four ramps in the course, so you must do a different ramp stunt on each of them. If you do all of the above correctly, you should hear the dolphin chattering when you cross the finish line. With this trick accomplished, return to the main menu, choose Championship mode and select the "Warm Up" option. When the Watercraft Select menu appears, highlight the character you want, hold the joystick **Down** and press a button to confirm your choice. (If you want the alternate-color character, hold **Up** on the D-pad while holding **Down** on the joystick.) When the race starts, you'll be riding the dolphin instead of a jet ski. With the dolphin trick accomplished, you'll also find that the game's demo mode alternates between the normal demo and a new demo of people riding dolphins

- If you select the VR bonus before entering Stage 4, you can destroy the helicopter easily by using the VR to freeze all of the enemies

just as the helicopter appears. Now you can ignore the enemies and concentrate on firing super batarangs at the helicopter.

- When the Monarch Bat makes its sweeping attack, press Punch + Kick to block, you won't take any damage. However, blocking will not protect you from the bat's fire attack.
- At the start of the game, if you jump on the hood of the Batmobile and stay there, you can prevent it from driving away so quickly.

BATTLE ARENA TOSHINDEN

Play as Gaia

Turn the game on and wait for the title screen to appear. While the words "1P GAME," "VS HUMAN," "VS COMPUTER" and "OPTIONS" are flying in from both sides of the screen, quickly press ↓ ↙ ← + before all of the text appears. You'll hear "Fight!" and the small text on the title screen will change from blue to pink. (If you don't get it to register the first time, you must wait for the demo to begin or start a game and cancel to return to the title screen, the code won't work if you're returning to the title screen from the Options menu.) At the fighter-select screen, highlight Eiji, hold **Up** on the D-pad and press any action button

Play as Sho

First enter the Gaia code. Next, wait for the title screen to appear again as described above. This time, while the words are flying into the screen, press → ← → ← + on Controller 2; you'll hear "Fight!" again and the text will change from pink to a greenish color. With that code in place, start a game. At the fighter-select screen, highlight Kayin, hold **Down** on the D-pad and press any action button. To choose the alternate-color version of Gaia or Sho, press **SELECT** before you hold the appropriate direction on the D-pad as described while choosing each character.

Easy Desperation Moves

Visit the option menu and configure your controller so that the **L** and **R** buttons are set up to trigger "Special 1", "Special 2", Special 3" and "Special 4"—setting A4 is a good example. Now you can trigger any character's desperation attack simply by pressing all four **L** and **R** buttons at exactly the same time whenever your energy bar is flashing red. Note that you can only choose the "special" control settings when the game's difficulty is set at "Easy" or "Very Easy"...unless you use the "Easy Special Attacks etc." code listed below.

Easy Super Moves

In addition to the desperation moves, each fighter in *Toshinden* also has up to three "Super" moves which are very difficult to execute, but can be used at any time during a match. Here's a list of all of the "Super" attacks, all shown as if your character is facing the right:

Eiji: ↑ ↓ ↑ ↓ → ← → ← + △ + ○
Kayin: → ↘ ↓ ← ↙ ← → ← + ○ + ×
Sofia (1): → ↘ ↓ ↘ → ← ↓ + △ + ×
Sofia (2): ↘ ↓ ↙ ↓ ↘ ← → ↓ + △ + ○
Rungo: ↗ ↑ ↖ ← ↙ → ← ↓ + △ + ○
Fo (1): → ↗ ↑ ↖ ← + □ + ○
Fo (2): → ↘ ↓ ↘ → ← ↓ + + ×
Fo (3) △ ○ ← → ← → + △ + ○
Mondo: → ↗ ↑ ↖ ← → ↙ ↓ + △ + ○
Duke: ↘ ↓ ↙ ↓ ↘ ↓ ← → + □ + ○
Ellis (1): → ↗ ↑ ↖ ← + □ + ○
Ellis (2): ↘ ↓ ↙ ↓ ↘ ← → ↓ + △ + ○
Gaia: ↘ ↓ ↙ ↓ ↘ ← → ↓ + △ + ○
Sho: ↓ → ↗ ↑ ↖ ← ↓ + + ×

The "Super" moves can be more trouble than they're worth, since they're so difficult to pull off. To make things easier, try this: First, enter both "boss" codes to access Gaia and Sho as described above. With those codes in place, wait for the demo to begin again, then return to the title screen once more and press ↙ + on Controller 1 while the words are zooming in. You'll hear the word "Fantastic!" and the text will change to white. With this code in place, set the Control Type for all four "Specials" as described in the "Easy Desperation Moves" code above. Now, at any time during the game, you can trigger one of your character's "Super" attacks simply by holding the **SELECT** button and pressing all four **L** and **R** buttons at exactly the same time.

Easy Special Attacks at Any Difficulty Setting

Once you've entered all three title-screen codes as explained above, wait for the demo to start and return to the title screen as before. While the words are zooming into the screen, press → ← → ← + on Controller 2, you'll hear "Fantastic!" again and the text will change to yellow. With this code in place, you will be able to choose the "Special" Control Types—A3, A4, etc.—at any difficulty setting, not just "Very Easy" and "Easy".

Camera Controls

Go to the Options menu and choose any control type that has all four of the top buttons set to "NOT USE." Move down to the Camera Action setting; you'll find a new camera angle option called "Your Self." Choose it, and you'll gain access to eight new Control Type settings labeled A5 through H5, with "Camera X" and "Camera Y" functions assigned to the **L** and **R** buttons on top of the controller. Choose one of the new Control Type settings and start the game. The top buttons function as follows.

L1 Rotate counter-clockwise
L2: Tilt backward
R1 Rotate clockwise
R2. Tilt forward

To access additional camera controls, press the **START** button on Controller 1 to pause the game. While the "Pause" menu is on the screen, hold all four action buttons (× + □ + △ + ○) and press **SELECT** once to make the pause menu disappear; press it again to remove the energy bars. (Note: You can use this trick at any time, even if you're not messing with the camera angles. To restore the "Pause" menu and energy bars, just pause the game, hold the four action buttons and press **SELECT** one more time.)

While the game is still paused with the Pause menu and energy bars removed, the controller has six new secret functions:

L1 Pan left
R1 Pan right
D-pad **Up**: Pan up
D-pad **Down**: Pan down
L2: Zoom in
R2 Zoom out

Pressing the **SELECT** button repeatedly on Controller 2 allows you to step through the character animation one "frame" at a time; holding it down will allow you to play the game in super slow-motion. Press the **SELECT** button on Controller 1 to toggle between the rotate/tilt camera controls and the pan/zoom controls.

While the words "1P GAME," "FULL BATTLE" etc. are flying in from the left side of the screen, quickly press **R1**, **L2**, ×, **L1**, **R2**, ○ before all of the text appears. You'll hear a signal to confirm the code if you're fast enough. At the fighter-select screen, highlight the "?" box; Master and Uranus are now included in the random characters that appear. To choose them more easily, hold the **SELECT** button; this slows down the random-select feature

Boss Code 2

With Boss Code 1 in place as described above, return to the title screen, while the words "1P GAME," "FULL BATTLE" etc. are flying in from the left side of the screen, quickly press ○, **R2**, **L1**, ×, **L2**, **R1** before all of the text appears. You'll hear a signal to confirm the code if you're fast enough. At the fighter-select screen, highlight the "?" box; Vermilion and Sho are now included in the random characters that appear. To choose them more easily, hold the **SELECT** button; this slows down the random-select feature.

Camera Controls

At the Options menu, set all four of the top buttons to "NOT USED." Move down to the Camera Action setting; you'll find a new camera angle option called "Camera." With this setting, you can change camera angles almost exactly as described under the codes for the original *Battle Arena Toshinden* game, the only difference is that you can't pan left or right.

MONSTER RANCHER

Secret Monsters

There are over 40 special monster types hidden in *Monster Rancher* that can only be found by using ONE specific CD in the Shrine. The following list tells you the names of some of the CDs you can use to get these special monsters. Please be aware that the CDs on the following list are not 100% guaranteed to work with *Monster Rancher* the way they should. Occasionally an audio CD will be remastered or re-released with slightly different track listings; if there are several different "pressings" of a particular CD, it may happen that your copy of the CD in question will not be recognized by the game and will not give you the monster you're expecting. Also, some monster types are so rare that you will not be allowed to leave the shrine with them unless you have "committee permission" from FIMBA. If you get a message like this one, you must continue to play the game until you improve your grade as a breeder.

More Secrets

- The average monster will not live long enough for you to take it from the "E" ranking all the way up to "S" rank. There is a special food item in the game which will automatically increase your monster's lifespan by one year; otherwise, you should try not to push your monster too hard if it is tired, sick or injured. If your monster lives to be 10 years old, you will be rewarded with a special birthday song!
- Some special monster types can be created by combining two monsters in the Lab with the right item. For example, If your monster goes out exploring with Karn and finds a Magic Banana, take it to the Lab and use it when you combine two very lazy monsters; both should have a "style" rating of "Spoil." The result will be a very rare "Ape" monster style.
- If you continue to play the game for many "years" of game time, new items will appear for sale in the item shop which will allow you to create rare monsters by using them when you combine monsters at the Lab.
- When your monster dies and you go to the shrine to create a new monster, there is a one-in-16 chance that the new monster will be imbued with the spirit of the monster who died. A monster who is "possessed" in this way will not live long, but if you take it to the Lab and combine it with another monster, you may be rewarded with a rare "Ghost" monster type.
- To earn the rare "Doodle" monster type, breed a monster of the "Monolith" type until its "Fame" level rises above 80. Once you're there, allow the monster to lose battles until its Fame drops below 65; if this happens, the monster will become vandalized and change into the "Scribble" type. Combine the "Scribble" monster with another monster in the lab to get the "Doodle" type.
- To earn the extremely rare "Disc" monster, you must freeze a monster of the "Gooaal!" type and another of the "Radial" type and combine them in the Lab.

MONSTER RANCHER 2

Secret Monsters

As in the original *Monster Rancher*, the best way to generate new and different monsters is by visiting the Monster Shrine and inserting different compact discs into your PlayStation; listen to the priest's instructions to find out how this is done. Any CD can be used, from your favorite music CDs to computer CD-ROM discs or even other PlayStation titles. The game reads some of the digital data from your CD and uses those numbers to generate a monster that you can raise on your farm. There are also many special monster types that can only be found by using ONE specific CD. For example, if you use Quiet Riot's *Metal Health* CD to create a monster, you'll get a creature called "Bloodshed" that you can't get from any other CD. The following is a list of these "special" CDs which can be used to create special monsters. Please be aware that the CDs on the following list are not 100% guaranteed to work with *Monster Rancher 2* the way they should. Occasionally an audio CD or PlayStation game will be re-mastered or re-released with slightly different track listings; if there are several different "pressings" of a particular CD, it may happen that your copy of the CD in question will not be recognized by the game and will not give you the monster you're expecting. *Tips & Tricks* apologizes for any such discrepancies you may encounter.

MORTAL KOMBAT 3

Play as Smoke

During the opening demo—anytime after the copyright screen appears—rotate the D-pad 360° clockwise until the "Ultimate Kombat Kode" prompt appears. Enter the code Dragon-MK-Dragon-Goro-Skull-Goro by pressing **R1** once, △ six times, × six times and ○ nine times. You'll hear Shao Kahn say, "Outstanding!" and a message will appear to confirm the code. Now Smoke is a selectable character in the one- or two-player modes.

Secret Cheat Mode

During the opening demo, quickly press ×, ○, □, **R1, R1, R2, R2, R1, R1**. You'll hear Shao Kahn say, "You will never win." Now press **START**, when the stone block appears with the word "KOMBAT" in red, press **Up** to access a secret cheat menu

Turn "Free Play" on for infinite credits in the one-player mode. Turn "Smoke" on to activate him as a playable character without using the Ultimate Kombat Kode. Turn "Fatality Time" off to give yourself infinite time to perform fatalities. Turn "Level Select" on and you'll be able to choose any stage—including the Hidden Portal—from a menu at the bottom of the character-select screen after you choose your fighter. With "One Round Match" on, fights will last just one round, and with "One Hit Death" on, the first player to strike will automatically win the round.

If you're having trouble remembering this code, here's a simpler version: During the opening demo, press ×, **L1, L2**. You'll hear a whooshing sound. Now you can access a shorter version of the cheat menu without the "One Round Match" or "One Hit Match" options.

MORTAL KOMBAT 4

Secret Cheat Menu

Start a game in two-player mode; when the "vs." screen appears, enter the Kombat Kode "3, Skull, 2, 2, 1, 3" as follows.

- Player 1: Press Low Punch three times and Low Kick twice
- Player 2: Press Low Punch twice, Block once and Low Kick three times

After the match starts, press **START** to pause and choose "Exit" to return to the main menu. Next, select "Options", highlight "Vs. Screen Enabled" and hold Run + Block. After a few seconds you'll hear a laugh; continue to hold the buttons down until the "Cheats" menu appears. Turn the "Endings" option on and you'll be able to see your character's ending sequence after winning just one match in one-player mode; the other three options allow you to perform fatalities with just one button press.

Secret Characters

To play as Goro or Noob Saibot, you must first enter the "Secret Cheat Menu" code shown above. Once that code is in place, start a game and follow these instructions at the character select screen:

1) Highlight the "Hidden" box at the bottom of the screen, press Block and continue to hold it down

2) To play as Goro, move the invisible cursor up to Shinnok (you'll have to listen to hear the cursor moving around so you'll know where it is), press Run and continue to hold it down

To play as Noob Saibot, move the invisible cursor to Reiko, press Run and continue to hold it down

3) Continue to hold Block + Run until the fight starts.

All-Star Weekend

Choose "Exhibition" from the main option menu; then, at the "Exhibition" menu, press **R1, L1, R1, L1, R2, L2, R2, L2**. You'll see a new option called "All Stars" at the bottom of the screen Set this option to "94/95" to play an exhibition match in Phoenix; the court will be decorated with the '94-'95 All-Star Weekend logo Better yet, if you press **R1, R1, R2, R2, L1, L2, L1, L2** at the Exhibition menu, the "All Stars" option will also allow you to choose to play a game in San Antonio with the court decorated as it was for the '95-'96 All-Star game. The teams will be called "Western Conference" and "Eastern Conference", but the players will still be those from the team you select.

Sneak Peek

THE NEED FOR SPEED

Hidden Tracks

Choose "One Player" from the main menu and select "Tournament" mode. Choose "Password" at the tournament menu and enter the password "TSYBNS", then press **START**. With this code in place, you can now return to the main menu and choose any game mode. When you reach the "Race Location" menu, you'll find a new, secret track called "Lost Vegas".

"Rally" Tracks

With the cheat password in place, highlight any track and hold the **L1** and **R1** buttons. You'll see the name of the track change to "Rally"; this changes the pavement to a slippery dirt road like those in *Sega Rally*. If you hold **L1+R1** while the "Rusty Springs" track is highlighted, you'll gain access to yet another secret hidden track; this one's a desert course called "Oasis Springs"

Secret Car

With the "TSYBNS" password in place as described, choose any game mode and access the car select screen. Highlight any car and hold **L1+R1**, now you can choose the top-secret "Warrior" car, a lightweight, futuristic vehicle that can zoom from zero to 60 in 3.5 seconds flat.

Arcade Mode

Again, with the "TSYBNS" password in place, get to the "Race Location" menu and highlight the "Segment View" (or lap-select) box. Hold **L1+R1** and you'll see the words "Arcade Mode" appear. Start the game in Arcade Mode and you'll find that the game plays much more like a *Ridge Racer*-style arcade game instead of a full-on simulation.

Machine Gun Horn

Choose the Head-to-Head mode on the Race Type Screen. Select your vehicle, then pick your computer opponent's car After selecting your opponent's vehicle, press and hold **L1**, ○, □ and diagonally **Up/Left** on the D-pad until the race starts. You can now blow everything out of your way by pressing **Up** to honk the horn. The noise it produces will sound like a machine gun.

NEED FOR SPEED II

Extra Camera Angles

When the "Loading..." screen appears before a race—with the course map on the screen—press and hold **L1 + R2** + △ + ○. Do not release the buttons until your car appears on the track. Now press the △ button to cycle through the different camera angles; you'll find that there are now nine different camera settings instead of the usual four.

Cheat Passwords

Enter any of the following passwords from the options menu to activate different features:

LILZIP—Access Ford Indigo car
SHOTME—Access Monolithic Studios track
POWRUP—Upgrade all cars to Pioneer engines

Secret Vehicles

Each of the following passwords will give you access to a secret vehicle, but they're different from the Ford Indigo code (above) because you don't get to choose the secret vehicles from the car select menu. Instead, pick any car and set up all of the other race options. Finally go to the options menu and enter one of the following passwords, then go immediately to the "Race" option at the main menu and you'll start the race with the secret vehicle you picked:

Army Truck—ARMYME
Volkswagon Beetle—BEETME
BMW—BMRME
Mercedes-Benz—BNZME
Volkswagon Bug—BUGME

School Bus—B U S M E
Citroen—C I T M E
Shipping Crate—C R A T M E
Pick-up Truck—J E P M E

Tyrannosaurus Rex—T R E X M E
Van—V A N M E
Volvo Station Wagon—V O V M E
Covered Wagon—W A G O M E
Jeep Wrangler—Y J M E

To give Player 2 a secret vehicle, just change the last letters of any of these codes from "ME" to "U". For example, if you want to play in two-player mode with two army trucks, enter the password "A R M Y M E", then enter the password "A R M Y U", then start the game.

NEED FOR SPEED V-RALLY

Cheat Codes

Watch the game's loading sequence carefully; when you see the Infogrames logo begin to appear on a white background, quickly press **Up**, **Down**, then immediately hold the button and press ○. You should see the words "LOCK OFF" in green letters, right in the middle of the screen; this allows you to access all of the tracks in Arcade or Championship mode. As soon as you see the words "LOCK OFF," if you release the and ○ buttons immediately you can enter any or all of the additional codes shown below; these buttons must be held down before the Infogrames logo is colored in and you must continue to hold them until the memory card message appears:

- Hold **L1** and the words "TIME OFF" will appear; now the race won't end if the timer runs out in Arcade mode
- Hold **L2** and the words "NARROW ON" will appear; now the tracks will be more narrow in Arcade mode
- Press **Left**, then press and continue to hold **R2**; the words "RESTART ON" will appear. This adds a "Restart" option to the "Pause" menu in both Arcade and Championship modes, allowing you to restart a race if something goes wrong
- Press **Left**, then **Right**; the words "FULL DEBUG" will appear. Now you can see the programmers' debugging data on the screen and in a new "Pause" menu option called "Memory." Note: You can't use the "Restart" option if you enter this code.

PARAPPA THE RAPPER

Rapping Tips

- If you hold one of the action buttons down, then press another one, the word that's associated with the first button will come out automatically as soon as you take your finger off the second button. Try this at the beginning of Stage 1, Lesson 3: While holding the button, press and release the ○ button repeatedly in a steady pattern. Parappa should say, "Kick, Punch, Kick, Punch, Kick, Punch" and so on, even though you're not pressing the ("Kick") button more than once. This trick also doubles your speed; instead of getting one word for each button press, you're effectively getting two. Use this technique when you're "Rappin' Cool!" for lots of extra words and bonus points.
- One of the game's best-kept secrets is that it's possible to use the D-pad to change the order of the words that come out of Parappa's mouth. This only applies in lessons or stages where more than one word is assigned to a single button; for example, during Lesson 5 in Stage 3, you say, "I have never sold everything, everything" using only the △ button. If you hold **Left** on the D-pad and press one of the buttons, it will "reset" the list of words that are associated with that button to the first word in the series. Similarly, if you hold **Right** on the D-pad while you're in the middle of that series of words, it will "hold" that word and let you repeat it as many times as you wish; when you release **Right**, you can continue with the rest of the series of words that are assigned to that button. Depending on when you apply the D-pad, you can make Parappa say, "I have never, I have never sold everything" or even "I have never, never, never sold everything." This is an important trick; not only does it make it easier to break the "Cool!" barrier in certain lessons, but if you use this method to mix up your raps when you're freestyling in "Cool!" mode, you'll earn more points!

" Continue to check this desk over and over again, on the 50th try, you will obtain a film. Take the film to the darkroom to develop it and you will get to see a secret photo of Rebecca from the original *Resident Evil*

Alternate Clothes

Start a game in Normal Mode and go through the city area (including the gun store and the bus) without picking up any items. If you go to the alley by the stairs in the R.P.D. lot, you will meet a very special zombie: It's Brad Vickers, the helicopter pilot from the original *Resident Evil*. Enter the police department and get the rifle/grenade launcher from the S.T.A.R.S. room, then go back out and kill Brad (you can't take him down with your normal gun). Next, check his body; you'll find a special key. This key opens the locker in the darkroom; if you open it, you will be able to change into a different set of clothing at any time

Shoot the Camera

Go to the outside area in the basement where the two dogs jump down from the fence, stand with your back facing the manhole and walk forward until the camera angle changes. Now draw your rifle and shoot, "bullet holes" will appear on your TV screen!

Bonus Weapons

If you beat Scenario One with an "A" or "B" ranking and your total playing time is under two-and-a-half hours, you will get a rocket launcher with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under two-and-a-half hours, you get both of these "infinite ammo" weapons plus a Gatling Gun, also with infinite ammo. You'll find the bonus weapons in the chest.

Secret Character: Hunk

To play as the bio-suit guy from the opening movie, you have to achieve an "A" Ranking in either Leon or Claire's Scenario Two, to do so, you must beat the scenario in under three hours without using any of the "infinite ammo" bonus weapons (see above). When you finish doing this, you will be asked to save a second time after the normal Scenario One/Scenario Two save. The saved game will say "Hunk," choose this to play as him.

Secret Character: Tofu

To play as a giant tofu, you must follow the instructions for playing as Hunk (see above). Once you've done this, you must continue playing until you have chained three sets of Scenario Ones and Scenario Twos (a total of six games). When you finish doing this, you will be asked to save an additional time. The saved game will say "Tofu," choose this to play as him. (Note: After you qualify for the "Hunk" save, you don't have to continue to get high rankings in order to access Tofu; just keep playing and always remember to save.)

RESIDENT EVIL 2 (DUAL SHOCK VERSION)

Extreme Battle Mode

Play through the game with either character and complete Scenario 2. After the credits roll, you will be rated as usual and a message will tell you that there is another mode. You will be asked to save the regular game and then it will ask you to save a second time for the Extreme Battle data. Extreme Battle mode can then be accessed by calling up the Load screen and selecting the EX Battle data from the Arrange Mode menu. If you're lucky enough to have kept a Scenario 2 save on your memory card from the original Resident Evil 2, you can use that with the Dual Shock version and simply complete the game to get Extreme Battle. When you beat the first level of Extreme Battle mode, you will earn the ability to play as Ada Wong; you can play as Chris Redfield if you beat the second level.

RIDGE RACER

Extra Cars

If you earn a "perfect" in the *Galaxian* loading game by destroying all of the enemy ships before they fly away, you'll get eight extra cars to choose from

Mirror Mode

When you start a race, drive forward a bit, then spin around and head back to the steel wall that says "Wrong Way". If you're going fast enough, you'll pass right through the wall to race in "Mirror Mode"

Galaxian 13

The game's toughest secret is the mysterious black car, which appears by the side of the road after you've completed the game—both forward and reverse tracks—in its entirety. If you can beat the black car by staying in front of him and allowing him to rear-end your vehicle all the way to the finish line, you can drive the car yourself and even save it on your memory card

Choose "Time Trial", then at the main menu, highlight the "Start" box, hold the Brake button and press the Accelerator button, continue to hold both buttons down until the race starts. (You'll have to press the Accelerator twice because the Brake button will take you back to the title screen.) Now you're playing in Spinning Mode. When you reach a turn where it's possible to spin your car 360°, the words "Spinning Point" will appear on the screen. Try to spin your car around, it helps if you choose a vehicle with a low "grip" rating. When you finish the turn, a toy car will drive across the screen and show you your total points for that spin. After the race, watch the replay to see a chart that shows your score on each Spinning Point along with your total for the entire race

TEKKEN

Galaga Secrets

To continue playing the *Galaga* loading game as many times as you wish, just press the **SELECT** button whenever the screen displays your "Number of Hits". If you score a perfect 40 ships in the first round, the game will automatically continue to the next wave; there are eight waves in all. If you don't like using the D-pad to move your ship, you can use the **L** and **R** buttons on top of the controller. Holding the △ button gives you rapid-fire.

Double Ships

There are two ways to get twin ships in the mini-*Galaga* game

Method 1: If you destroy a perfect 40 ships in the first wave with a total time of 18 5 seconds or less, you'll get the double ships for the second wave through the rest of the game

Method 2: When you first load the game, wait for the PlayStation logo to appear, then hold **Up**, **L1**, △ and × on Controller 2 until the *Galaga* game starts. Now you can use the twin ships on the first wave.

Secret Character: Devil Kazuya

To play as Devil Kazuya, you must score a perfect "40" on all eight waves of the *Galaga* game without using more than one continue and without using Method 2 (described above) to get the twin ships. After you've done this, start the game in Arcade mode, highlight Kazuya and press the **START** button to choose his evil alter-ego.

Play as the Boss

You've probably noticed the extra characters that you can earn in *Tekken* by beating the game in Arcade mode. Each of the game's eight characters will "release" one additional fighter when you beat the game with him or her. If you beat the game with all eight characters, you'll earn an additional eight hidden characters to use in Arcade or two-player mode. To earn the big boss, Heihachi, as a playable character, you must beat the game with any character in Arcade mode without continuing. You may find it easier to do this if you visit the option menu and set the round time to 20 seconds; it also helps to choose one-round battles.

Hidden Character Demos

With the exception of Devil Kazuya, you can watch any of the game's fighters mixing it up in the demo mode. To do this, hold down the buttons as shown while the game is in demo mode:

Kazuya: Hold ↑ on the D-pad
Paul: Hold ↗ on the D-pad

This also works on Controller 2. For example, if both players hold all four **L** and **R** buttons on top of both controllers, the demo will show Heihachi fighting Heihachi

TEKKEN 2

Hidden Characters

When you beat the game in one-player mode with a particular character, the "boss" character you defeated will become available as a playable character in all game modes. When you play in one-player mode as one of the "boss" characters, you'll face Kazuya, beat him and he, too will become a playable character. Beat the game as Kazuya and you will face Devil, defeat him to add Devil and Angel to your ranks. Finally, when playing in one-player mode, you must win Stage 3 with very little energy left; you'll hear the announcer say, "Great!" if you've met this requirement, and your next opponent will be Roger or Alex. Defeat him and you'll have all of the game's characters at your command. To play as Alex, highlight Roger and press either **Kick** button; to choose Angel, highlight Devil and press either **Kick** button. Note. You must have earned all of these characters to perform any of the following tricks.

There's a small gauge near the upper left corner of the screen that helps you to judge your distance from your opponent.

- Super Juggle Mode

Hold **SELECT** and **Up** on the D-pad before the "Vs." screen appears; when the round starts, you'll hear an explosion sound. Now whenever you use an attack that makes your opponent go up in the air, they will go much higher, which makes juggling more interesting

TEMPEST X3

Power-Up Swarm

At the start of a stage in "Tempest X3" mode, shoot the first creature and fire your superzapper before the power-up reaches the top of the playfield; do *not* collect this first power-up. Now play normally and you will receive power-up items from nearly every enemy you shoot

X-MEN VS. STREET FIGHTER

Secret Options Menu

At the main menu—the one that says "Battle Mode/Vs Mode/Training Mode" etc.—press △, △, **Right,** ○, **L1**; you must enter this code very quickly. If you've done it fast enough, you will be taken immediately to a secret "EX Option" menu with two special options:

- "Game Mode" lets you use a limited version of the "tag team" option from the *X-Men vs. Street Fighter* arcade game To do this, set "Game Mode" to "Original", then start a game in Vs. Mode. At the character-select screen, Player 2 must choose the same characters that Player 1 has chosen, but in the opposite order. (For example: If Player 1 chooses Cyclops, then Ryu, Player 2 must choose Ryu, then Cyclops.) If you've done all this correctly, when the fight starts you'll see that each of the four characters has his or her own energy meter. During the match, if you press Fierce Punch + Roundhouse Kick simultaneously (that's **L1 + R1** if you haven't changed the game's default control configuration) you will "tag out" and switch places with your partner, who enters with an immediate attack on your opponent.
- If you set the "Hyper Combo Gauge" option to "Full," your Hyper Combo Gauge will fill up to Level 3 automatically when playing in Vs. Mode

Play as Apocalypse

First, beat the game in Battle Mode at any difficulty setting without losing a single round. Once you've accomplished this, start a game in Vs. Mode. Alternate Character Color/Texture

Press **Up** + any button when choosing your fighter at the character-select screen.

Additional Color Choices

After you have beaten the game at any skill level with any number of continues, go to the character-select screen and hold **SELECT**. Now push any other button (including the **L** and **R** buttons) to choose different character colors.

Stage Select

When your total playing time passes the 30-hour mark, you'll hear the announcer say, "Wow!" when you return to the title screen. Now you have the option to choose any stage from the character-select screen in "VS Play" mode.

Hidden Comic Strip

First, beat the game in "Easy" mode without continuing. Once you've done this, highlight "Option" at the title screen, then grab Controller 2 and hold **L1+L2+R1+R2+START+SELECT**; you'll see a secret NECO comic strip.

Secret Bosses

To fight against XTAL, you must play all the way through the game with all eight characters—including ZULU—without using a continue

To fight against NECO, you must play through the game as XTAL without using a continue, then, when the XTAL icon comes down from the top of the screen at the pre-fight map screen, hold **L1+L2+R1+R2**, then **SELECT**, then **START**. The text box will say "XTAL" but you will really be fighting against NECO

Boss Codes

To play as ZULU, you must defeat the game at any difficulty setting with all of the characters, one at a time.

To play as XTAL, you must defeat the game at the "Normal" or "Hard" difficulty setting without using a continue; you must also defeat XTAL.

To play as NECO, you must play as XTAL or ZULU and defeat the game at the "Normal" or "Hard" difficulty setting without using any continues.

Flat-Shaded Turbo Mode

The coolest *Zero Divide* cheat of them all has two steps: You must play the game until your total playing time is over 100 hours, and you must have performed a five-hit combo at any time. Once you've met both of these requirements, go to the Option menu, highlight the "Match Point" option, hold **L1 + L2 + R1 + R2** on Controller 1 and press **Down**. You'll see the words "Shadow Obj" appear in the corner of the screen, just above the save counter. With this option in place, start the game and get ready for a surprise. The "Shadow Obj" option allows you to play the game with characters made of flat-shaded polygons instead of texture-mapped polygons; it also eliminates the background graphics. Not only does the game look different this way, but because the PlayStation is freed up from having to process all of those flashy texture maps, you'll find that the game's speed has been tripled, maybe even quadrupled! To disable the "Shadow Obj" option and return the game to normal, just highlight "Match Point", hold **L1 + L2 + R1 + R2** and press **Down** again.

Hidden Game

Put *Zero Divide* into your PlayStation, hold the **SELECT** and **START** buttons on Controller 2 and turn the **POWER** switch on. Continue to hold the buttons down while the game loads; instead of *Zero Divide*, you'll get a hidden version of *Phalanx*, a classic Super NES shooter. You must use Controller 2 to play the game.

FACEBALL 2000
Secret Rooms/Level Warps
When you find the exit in the first level of the Cyberscape game, shoot the exit five times; you'll be sent to a special room with a speedup pod, a nine-lives pod and warp doors to levels 10, 15, 20 and 25

If you shoot at the nine lives pod three times, it will change into a key; grab it and the west wall of the secret room will open to reveal another room with a speedup pod, an automag pod, a level 3 armor pod and warp doors to levels 30, 35 and 40. (Watch out for the Ninja that's waiting in this room, though.)

Note that the armor pod did not disappear when you took armor from it. Travel to the west wing of the secret room and find the wall that faces south. (When you see the south wall, there will be a flashing warp door to your right, that's the exit to level 40.) Shoot the south wall once, then touch it. Then go back around the corner to the armor pod. Touch the pod and shoot it to get a key that opens the south wall and a third secret area with two ninjas. Defeat them to find an automag pod, an armor pod and warps to levels 45, 50 and 55

Next, go to the southeast corner of this room, shoot the east wall, then touch it. Now go back to the automag pod and touch it three times, it will turn into a key that will open the east wall in the corner, which leads to yet another secret room. Inside are automag, speedup and armor pods as well as three more nasty ninjas and warps to levels 60 and 65.

Finally, check out the east wall of this newest room. Stand near the center of the wall and move slightly to the left; now touch this part of the wall five times and shoot it once to open a secret door that leads to the final part of the first level. Just inside the door is a warp to level 70, but there are also four ninjas waiting for you.

Each of the following tricks works in DJ mode when your character is on the screen:

- If you highlight "SE" and tap **Right** on the D-pad, the song will restart from the beginning. Try tapping **Right** repeatedly to "stutter" the first note
- If you highlight "SE" and hold the D-pad diagonally in the **Up/Right** position, the music will be temporarily transposed into a higher register. Likewise, if you hold **Down/Right**, the music will change to a lower key.
- If you highlight "Tempo" and hold **Left** on the D-pad, the music will play in reverse.

Next, enter DJ mode, press **SELECT** to access the "Trippy-H" synthesiser screen, make sure the "Sound I" tab is highlighted in the upper left corner of the screen, hold the **START** button and press **A**. The Printer will spit out a long table of information that tells you everything you need to program the current tune on any Game Boy Camera (Note: The Game Boy will stop playing music during this process. POKÉMON (Red, Blue and Yellow versions)

Celadon "Rocket Game Corner" Tips

- Slot Machines—Watching the reels carefully can increase your odds of getting a match. For example, watch for a particular image or number to scroll by, and hit the **A** button as soon as it appears for each reel. The chances of you lining up another image is fairly high, as long as you don't get dizzy staring at the tiny Game Boy screen. Although it's claimed that the slot machines inside this casino have different odds, watching the reels works on all of them
- Secret Coins—After speaking to the other people in the casino to get coins, you can discover secret coins lying around the floor of the Game Corner by moving around and pressing **A**.

Evolution Tip

Some Pokémon can only be evolved through the use of elemental Evolution Stones It is a bad decision to evolve your Pokémon right away, since there may be some attacks it can only learn in its Basic Evolution stage that it would never learn if you evolved it right away.

Hidden Machine Tips

- Hidden Machines, or HMs, are permanent If you teach them to one of your Pokémon, they will never forget it; therefore, don't teach weak HM skills like "Cut" to a Pokémon you intend to use as part of your main party.
- HM 01 (Hidden Machine 01): Cut—When you use Cut in a grassy area, you will clear away four squares of grass. Using this method is one way to avoid random encounters with wild Pokemon.

Master Ball Tip

The Master Ball is an ultimate Pokéball that can capture any Pokémon instantly. It can only be used once, so don't waste it on a common Pokemon It should be saved so it can be used to capture Mewtwo or one of the three Legendary Birds.

Fight Mewtwo

In order to fight Mewtwo, you need to gain access to the Unknown Dungeon. You must defeat the Elite Four before the man blocking the entrance will allow you through Also, you must NOT reset your game after you've beaten it. Wait for the credits to finish, then go back to the Start screen by pressing **A** Fly to Cerulean city, then use a Pokémon that knows Surf to get to the Unknown Dungeon, which lies to the northwest of Cerulean city. Right before you fight Mewtwo, save your game. That way if you lose or if Mewtwo faints, you can quickly reset the game. You should also do this before fighting other "one-time-only" Pokémon like Zapdos, Articuno and Moltres. When you fight Mewtwo, either use the Master Ball immediately or use sleep attacks and a lot of Ultra Balls

Quick Experience Gain

If you have a group of strong Pokémon with one weak Pokémon, you can level up your weak Pokémon quickly by letting it share experience with a stronger one. Put the weak Pokemon at the top of the list so it always goes out into battle first. Switch it immediately with a strong Pokémon and the two will split the experience points in half. This is an excellent way to level up Pokemon like Magikarp, which are useless before they evolve

Rare Candy Tip

Gaining levels by using Rare Candy on your Pokémon is not as effective as leveling up your Pokémon normally. Pokémon who legitimately gain experience improve their statistics more dramatically than Pokémon who only used Rare Candy, so it's not a good idea to use a lot of Rare Candy on one Pokémon at once, since it will be weaker than other Pokémon that are the same level

Increase Stats

Use one of your Pokémon in battle until all of its PP for one move is depleted. Take it to a Poke Center to store it in Bill's PC, then immediately take it out again Heal your Pokemon at the Poké Center, then check its statistics—you'll find that some of its attributes have slightly increased This will occur even if you are using a Pokémon that is already at Level 100

POKÉMON: SPECIAL PIKACHU EDITION (Yellow version)

Level Up Pikachu

When playing *Pokémon Yellow*, your starting Pikachu will obey you no matter what level he is or how many badges your character has earned. Knowing this, one quick way to blaze through the game is to trade your starting Pikachu into another *Pokémon* game that you've already finished and quickly level Pikachu up by having him lead off during battles in the Elite Four tournament. When you trade him back into *Pokémon Yellow*, your character will have no trouble controlling him, even if his levels are maxed out and you haven't earned a single badge This will only work with your *Pokémon Yellow* starting Pikachu, i e the one that follows you around everywhere

Bucket-Head Pikachu

Pikachu trails behind your main character during the game, and you can turn around and "speak" to Pikachu to get a graphical representation of what's on his mind. When you take Pikachu fishing, maneuver your character so you're standing beside Pikachu. After fishing, turn to speak to Pikachu and he will respond with a bubble over his head with a picture of a fish in it. Zoom in on Pikachu and you'll see that he's put your fishing bucket on his head!

ASAVE—With this code in place, your game will automatically be saved after you complete each level without having to go visit Wrinkly Kong

COLOR—This code makes Dixie's clothes purple and Kiddy's pajamas green, it also changes the colors of the flags that mark each completed level accordingly.

HARDR—This code is supposed to make the game more difficult, but after all these years we still haven't figured out what the exact differences are.

TUFST—Entering this password makes the game harder by removing all of the continue barrels from each level. If you play the full game with this code in place, you can get up to a 105% completion rating

MERRY—This code changes the music in all of the game's bonus stages to a Christmas motif; it also changes the stars and bananas in the bonus stages to ornaments and presents.

MUSIC—Enter this code to access the secret "Dixie Kong's Music Test" screen, which allows you to sample all of the background tunes from the game

WATER—Enter this code, then start the game. Swim in the water to the left of Funky's Rentals without any vehicles and go up to the waterfall on the left side of the map. When you touch it, you'll discover a secret puzzle cave that's just like the caves where you find banana birds. If you repeat the sequence correctly, you'll be rewarded with up to 85 bonus coins, enough to pay Boomer Bear to blast away all of the obstacles in the lost world of Krematoa

DOOM

Chainsaw Trick

When you have a chainsaw in your weapon inventory, strange things can happen—namely, if you fire off every round of ammunition for one of your weapons, the game will usually give you a new, more powerful weapon by mistake. Here's how it works: When one of your weapons runs out of ammo, the game is supposed to switch to a different weapon in your possession. However, once you've picked up a chainsaw, the game's logic gets screwed up. For some reason, running out of ammo can grant you the next most powerful weapon that's missing from your arsenal. The weapons progress in the following order: pistol, shotgun, chain gun, rocket launcher, plasma rifle. (Unfortunately, you can't seem to get the BFG 9000 with this trick.) Now, let's say you are walking around with a shotgun, chain gun and rocket launcher. If you have a chainsaw, just fire off all of your pistol rounds and you should get a free plasma rifle—even if you're in a stage where there's no plasma rifle to be found. Experiment with this sneaky trick to learn how to make it useful in different situations

MADDEN NFL 96

Secret Teams

There are dozens of hidden teams in the game; most of them are classic NFL and AFL line-ups, some are all-pro squads and several are teams from the little-known World League of American Football. To find them, simply access the "Team Selection" screen and enter one of the following codes. The cheats work for either team, so if—for example—you wanted to pit the '76 Vikings against the '95 Barcelona Dragons, you'd just put the NFL cursor on the left side, enter the Vikings code, then move the cursor to the right and enter the Dragons code. All codes are entered with the A, B and C buttons.

MIGHT & MAGIC GATES TO ANOTHER WORLD

Secret Cheat

Choose "View Character" from the non-combat menu. When the screen says "View Which?", press and hold **Left**, **A** and **C**, then release all three buttons at once. When the character menus come up, press **Left** repeatedly; you'll start to see stats for a lot of strange characters with incredible weapons and armor. If you make these weird characters trade their treasures to the members of your party, you'll be able to get tons of important items quickly and easily. You can earn quick experience points by accepting the knight's quest—since you'll probably have immediate access to the weapon he asks for—and you can sell the unused weapons for plenty of gold

Free Food

Choose the "Share" option from your command menu and select "Food". After repeating this several times, your entire party's food supply will increase

MIKE DITKA POWER FOOTBALL

Punt Trick

On offense, choose "punt" at the play selection screen; then, as your players are lining up on the field, press **START** and go to the "Substitutions" menu. Replace your punter with a fast player—one with a speed rating of 80 or more—and return to the game. When the ball is snapped, head for the left or right sideline and take off running. When you get 15 or 20 yards past the line of scrimmage, all of the players on the opposing team will freeze like ghostly statues—you can run all over the field and walk right through them. In a two-player game, the player who is being controlled by your opponent will be the only one who can move.

Easy Out

If the computer team has men on second and third or bases loaded, press the **B** button and throw the ball to third base, then quickly throw to first. You'll see the runners take off—but the man on second takes so long to get back to the base that you can always pick him off.

MORTAL KOMBAT

Fatalities

When the screen says "Finish him!", quickly enter the code shown below for your character. If you can't get it to work, you may be standing too close or too far away, so experiment with different distances.

Liu Kang—Down, Back, Up, Forward, Down

Johnny Cage—Forward, Forward, Forward, **A**

Kano—Back, Back, **A**

Rayden—Forward, Back, Back, Back, **A**

Sub-Zero—Forward, Down, Forward, **A**

Sonya—Forward, Forward, Back, Back, **START** (Block)

Scorpion—Up, Up (easier if you hold Block)

Secret Boss

To find the secret character, Reptile, you must play in one-player mode until you reach the stage called "The Pit". Now look at the moon in the background; if there is a shadow of any kind flying in front of the moon, follow these steps: You must win two perfect rounds (a "Double Flawless" victory) without ever using the Block button, and you must successfully perform your character's fatality on your opponent. If you do all of this, you'll be sent down to the bottom of the Pit to face the green ninja, Reptile. If there is no shadow flying in front of the moon, you cannot reach Reptile. The "Super Cheat Code" below can help you; turn on Flag 2 at the cheat menu to guarantee a shadow in front of the moon on the Pit stage.

Arcade Mode

Wait for the screen which says, "The word 'code' has many different definitions," etc. Press **A**, **B**, **A**, **C**, **A**, **B**, **B**. You'll hear Scorpion say, "Get over here!" as the letters turn blood-red. You've just activated "Mode A," with all fatalities and blood effects intact.

Super Cheat Code

At the "Game Start/Options" screen, spell the word "DULLARD" with the controller by pressing **Down**, **Up**, **Left**, **Left**, **A**, **Right**, **Down**. A third menu item called "Cheat Enabled" will appear. Highlight this new option and press **START**; you'll get a hidden configuration menu with new options as follows:

- Fighter 1/Fighter 2—Control what characters will be seen in the "Demo" mode (see below).
- Plan Base—Fight your opponents in a predetermined order in the 1-player mode.
- Chop-Chop—Allows you to choose which materials you'll be shattering in the block-breaking Bonus round; this only works when you enter the Bonus stage from this cheat menu by choosing "Chop-Chop" under the "Demo" option.
- 1 Play Chop/2 Play Chop—These numbers determine the frequency with which the Bonus stage appears during the game. Choose "1" to make the bonus stage appear after every battle or "6" to stall it for six battles. "0" disables the Bonus stage entirely.
- Demo—This option will show you different sequences from the game; just pick a scene and press the **A** button to view it.
- FLAG0/FLAG1—Player 1 and/or Player 2 starts each round in "Danger" mode; one hit and you're dead.
- FLAG2—Guarantees a shadow in front of the moon on the Pit stage.
- FLAG3—Changes the moon shadow into the head of Fergus McGovern of Probe Software.
- FLAG4—Gives you Reptile hints before every battle.
- FLAG5—Gives you infinite credits.
- FLAG6—The computer does fatalities on you in one-player mode.
- FLAG7—Locks in the background at the Palace Gates stage all the way up to the endurance match.
- Blood On—Turns on the blood effects and arcade fatalities.
- Cheat On—Turn this "Off" to deactivate all of the flags simultaneously; otherwise, leave it in the default "On" position.
- 1st Map—Use this to select the starting scenario or background. If you choose to start at the Pit, you will always get a shadow in front of the moon, which makes it easier to find Reptile.

MORTAL KOMBAT II

Test Modes

At the options menu, put the cursor on "DONE!" and press **Left**, **Down**, **Left**, **Right**, **Down**, **Right**, **Left**, **Left**, **Right**, **Right**. A new menu option called "Test Modes" will appear. The new menu options allow you to make either player invincible, put either character in "Danger" mode, choose any background, set free play, make the computer do fatalities and more.

Fergality

At the Test Modes menu, set the Background to 6 and turn on the "Oooh, Nasty!" option. Play the game as Rayden, and when it's time to do a fatality on your opponent, press **Away**, **Away**, **Away**, **Block**. That weird character is Fergus McGovern of Probe Software, developer of the Genesis version of *MKII*

MORTAL KOMBAT II (32X)

Test Modes

At the options menu, put the cursor on "DONE!" and press **Left**, **Down**, **Right**, **Right**, **Down**, **Left**, **Left**, **Left**, **Left**, **Right**, **Right**, **Right**. A new menu option called "Test Modes" will appear, giving you options similar to the Genesis cheat menus described above

MORTAL KOMBAT 3

Play as Smoke

When the *MK3* logo appears at the beginning of the game and you hear a gong, press **A**, **B**, **B**, **A**, **Down**, **A**, **B**, **B**, **A**, **Down**, **Up**, **Up**. You'll hear Shao Kahn say "Smoke" and the background color will change from black to blood-red. Now Smoke is a playable character in both the one- and two-player modes.

Endurance Mode

At the main menu, highlight the words "Start Game", hold the **A** and **C** buttons and press **START**. This takes you to a hidden character-select screen in which both players can choose up to eight fighters for an Endurance match. Press **START** to register for the battle, then use **Left** and **Right** on the D-pad to choose a fighter for each box in the line-up. Press **B** to choose a fighter at random for the current box, or hold **Up** and press **START** for a random selection of characters for all boxes. Choosing the dragon logo is the same as choosing a character at random, but you won't know who the character is until his or her turn comes up during the fight. With a Sega Tap adapter, up to four players can participate.

Secret Cheat Menus

At the main menu, press **A**, **C**, **Up**, **B**, **Up**, **B**, **A**, **Down**. A new menu item called "Cheats" will appear. Choose it, and you'll get a secret menu with several new options. "Sound Test" lets you listen to all of the sound effects and music from the game, "Continues" allows you to change the number of credits in a one-player game (up to 95) and "Bio Screen" lets you see any character's biography simply by pressing the **START** button.

Also at the main menu, press **B**, **A**, **Down**, **Left**, **A**, **Down**, **C**, **Right**, **Up**, **Down**. Another new menu item called "Secrets" will appear. The "Timer" option allows you to change the speed of the game clock, or switch it off entirely. "Win Screen" lets you see the ending story of any character by pressing the **START** button, and "Kombat Zone" allows you to choose which stage you'll be playing in when you start the game.

Another cheat code that can be entered at the main menu is **C**, **Right**, **A**, **Left**, **A**, **Up**, **C**, **Right**, **A**, **Left**, **A**, **Up**, which gives you a "Killer Codes" menu. "Quick End" lets you perform fatalities, babalities, etc. with just one or two buttons, usually the last button (or combination of buttons) in the series when you perform the finishing move normally. (For example: the sequence for Jax's normal Friendship move ends with the **LOW KICK** button. If you set the "Quick End" option to "Friendships", you can do Jax's Friendship move by simply pressing the **LOW KICK** button once when the screen says "Finish Him!") The "Smoke" option gives you the ability to activate Smoke as a playable character without the hassle of entering the "Play as Smoke" code described above, and "Bosses" lets you choose Shao Kahn or Motaro as controllable characters—but only in two-player mode. "Play Hidden Game" lets you sample the hidden shooter game which appears when the battle counter reaches 100 in the normal game; hold any button after you lose your last ship to see some statistics about your performance.

First, press **Right** on the D-pad to enter the left tube, which will drop you in the Hall of Mirrors.

Walk right until you come to the mirror with wheels and **push the mirror** to get rid of the scary clown. If the clown spooks you away, come back and push the mirror before the clown is in view. Take the **spark plug** the clown drops and exit to the left.

Enter the door marked "Employees Only" to the right of the strong man; it leads to the dressing room. Take an **application** from the table, then **open the trunk** and take the **wrench.**

Now enter the funhouse again and press **Left** to enter the tube to the Haunted House. **Use the wrench on the bolts** in the monsters neck, then exit.

Once you are on the roller coaster, quickly **use the brake handle.** After you are safely stopped, **use the bolts with the track.** After the track is repaired, use the brake again. On the second roller coaster screen, quickly **use the second brake.** If you miss either brake, you can ride the coaster again without hassle. **Open the shed** next to the track and take the **paintbrush.** Now use the brake again to finish the ride.

There is a stamp on his desk, so **use the rubber stamp with the application** Return to the front lot and enter the arcade tent. **Give the tickets to the dart attendant, then use the darts** (the darts he places on the counter, that is; the one in your inventory won't work.) Play the game three times to win the **teddy bear.** Finally, go right to the dressing room and **use the application with the bulletin board.** Walk to the front lot and take the **sign** from next to the Java Hut, then go to the back lot. **Give the teddy bear to the balancing bear** and take the **ball** she leaves behind. **Use the paintbrush with the bucket with Inky,** then **use the Inky brush with the sign. Use the sign** to complete your trap. Now you have to get the clown into the ferocious beast's cart, so while he is standing there looking confused, **use the dart with the ball**

VECTORMAN

Hidden Game + Level Warps

When the Sega logo appears at start-up, notice that you can move Vectorman around the screen with Controller 1. To find a hidden game, move Vectorman under the Sega logo and shoot straight up at it exactly 24 times. Next, make Vectorman jump up and hit his head on the logo exactly 12 times. You'll see the words "Get Ready" on the screen, then the letters "S", "E", "G" and "A" will begin to fall from the sky; 120 of them, to be exact. If you catch between 90 and 109 letters, you'll be able to start the game at Day 5; if you can catch 110 letters or more, you'll warp to Day 10.

Blow Up Sega

Also at the Sega logo screen, stand on the ground just slightly to the right of the logo and fire your weapon straight up into the air. There's a TV set hidden just off the screen; if you blow it up, it will reveal an Orb power-up. (You'll have to jump up from the logo to grab it.) If you detonate the Orb, the Sega logo will go dark and the background will stop moving.

Cheat Codes

Vectorman has tons of cheats that can be activated during the game with the following sequence: Press **START** to pause, enter the code, then press **START** to unpause. Try the following codes while the game is paused for different effects:

ABRACADABRA (**A**, **B**, **Right**, **A**, **C**, **A**, **Down**, **A**, **B**, **Right**, **A**)—Refill your energy counter at any time.

BALL or BALD (**B**, **A**, **Left**, **Left** or **B**, **A**, **Left**, **Down**)—See the programmers' debugging coordinates.

ABACABB (**A**, **B**, **A**, **C**, **A**, **B**, **B**)—Five dots will appear around Vectorman and follow him wherever he goes.

DRACULA (**Down**, **Right**, **A**, **C**, **Up**, **Left**, **A**)—When you get hit, the game will slow down in order to help you to recover safely

CALL A CAB (**C**, **A**, **Left**, **Left**, **A**, **C**, **A**, **B**)—Vectorman turns into a small arrow. This works like a level warp; you can move the arrow anywhere in the current level without taking any damage, so use it to skip the tougher parts of the game. You can't shoot TVs or collect power-ups while you're an arrow, but you can destroy many enemies just by touching them. When you want to change back into Vectorman, just pause and enter the CALL A CAB code again.

You'll hear a chorus of voices shouting to confirm the code Now advance to the Main Menu and you'll find a new option called "League Mode". Here are rough translations of what the menu items say at the League Mode screen

- Game Start: Start a game in League Mode. When you choose this item, you'll get a menu that asks you to select the names of the two people who will be competing. If you have not registered your name for League Mode play (see below) you must choose name 6, a generic name which will allow you to play without any records being saved. The last two items at the bottom of the play menu are "View Records" (see description below) and "Return to League Mode Menu".
- Name Entry: Choose from one of five save slots and enter your name. Move the cursor to the "ABC" item and you'll be able to enter your name with the standard alphabet instead of the default Japanese Hiragana characters. The three-character item in the upper right corner says "backspace" and the one in the lower right corner means "done".
- Delete Name: Use this option to remove any of the registered names from the machine's memory. When you select a name to delete, a small menu will come up which asks you to confirm if you really want to remove the selected player and all of his or her records from the league; choose the top item to say "Yes".
- View Records: Use this option to check your stats. The first screen shows your winning percentage; highlight your name and press **A** or **C** to view win/loss records against each player
- View Records / Return to Main Menu. The next-to-last menu item brings up a quick description of how the League Mode works, there's really nothing here that you can't figure out on your own just by playing the game in League Mode for a while. The last option at the League Mode menu takes you back to the Main Menu

CHRISTMAS NIGHTS

Date and Time Codes

The *Christmas NiGHTS* limited-edition sampler disk uses the Saturn's internal clock to change the game depending on the date and time you play the game. To force any of these changes whenever you want to, access the Saturn's System Settings menu and change the date and time to get different effects. Note: It's a little known feature of the Saturn that if you load a game, then hold the **L** and **R** buttons and press **RESET** on the machine, the System Settings menu will appear without having to load the CD menu; when you exit, you'll go right back into the game. This comes in handy when testing out some of the *Christmas NiGHTS* features as follows:

- Enter dates in December or January to play in the snow with a Christmas theme.
- Enter dates from other times of the year to play with the standard *NiGHTS* settings. You'll also see Claris and Elliot's clothes change depending on the season
- Enter the date April 1 to play as Reala; this will also add a new option to the Presents menu that will allow you to play as Reala whenever you want.

Additionally, the time of day changes the way the game appears. Set the clock for daytime and it will be daytime in the game; set the clock for nighttime and in the game it will be night. Also, if you've got the date set for a time of year when there's snow in the game, you can change the snow to different items as follows:

- At 9:00 AM the snow changes to crescent moon shapes.
- At 12:00 PM the snow changes to purple gems
- At 3:00 PM the snow changes to falling candy.
- At 6:00 PM the snow changes to sparkles.
- At 9:00 PM the snow changes to star shapes.
- At 12:00 AM the snow changes to red hearts.

DECATHLETE

Tumble Racing

In the 100-Meter Dash, as soon as the announcer starts to say your course number and name, carefully press **Left, Right, Left, Right, X**. When the race starts, your athlete will roll to the finish line like a tumbleweed.

Hop On One Leg

Also in the 100-Meter Dash, as soon as the announcer starts to say your course number and name, carefully press **Up, Left, Down, Right, X**. When the race starts, your athlete will start to run, then hop on one leg until the end of the race. Both of these tricks seem to make your character move a little faster.

DIE HARD ARCADE

Hyper Deep Scan

At the main title menu, highlight "Deep Scan", hold **X + Y + Z** and press **START**. When you enter the *Deep Scan* mini-game, you'll see that the logo now reads "*Hyper Deep Scan*". This makes the game much more difficult, with dozens of enemy submarines appearing on the screen at the same time. You can't earn extra credits to play *Die Hard Arcade* in this mode, either.

DIE HARD TRILOGY

Cheat Menu

While the game is loading, a copyright screen will appear with white letters on a black background. As soon as you see it, quickly press **C, A, B, B, Y, C, A, B, B, Y** before it disappears. There will be no signal to confirm the code, but when you start the game in any mode, press **START** to pause and you'll find a "Cheat" option at the pause menu. The cheat menu allows you to warp to any stage, become invincible (in *Die Hard* and *Die Harder*) or get infinite lives (in *Die Hard with a Vengeance*).

Z—Walk forward
B—Walk backward
Y—Strafe left
C—Strafe right
A—Action
L—Fire weapon
R—Jump

Note: If you don't own an analog controller, this code is useless because it will assign two different functions to the D-pad, the result is that you'll be accidentally changing weapons whenever you want to turn left or right. To return to the standard control scheme, just enter the code again.

Stage Select

At the main menu—the one that says "New Game/Load Game" etc.— press **X, Y, Z, Z, Y, Z, Y, X, Y**; this code must be entered quickly. GUARDIAN HEROES

Cheat Mode

To access a Debug feature, choose "Option Mode" from the title screen. When the Options menu appears, highlight "EXIT" and hold the **X, B** and **Z** buttons. Here's the tricky part: While holding those buttons down, press and continue to hold **Down** on the D-pad, then quickly tap the **A** button while the "DIP Switch" option is highlighted Note that you must tap the **A** button before the cursor starts to move down again—remember that you're still holding **X+B+Z+Down**—and you must release the **A** button immediately after you press it, before the DIP Switch menu appears.

If you've done this correctly, you'll find three new options at the dip switch menu Turn the "Enemy Level Disp." option on to see the experience levels of all enemies in the Story Mode. With the "Next Exp Disp." option on, you'll get a red-and-black "Next" indicator on the screen in Story Mode that saves you from having to pause the game just to find out how many experience points you need to go up a level Best of all is the "Debug" option; turn this on to gain access to the following features:

- A "Test Mode" option will appear at the Options menu; this allows you to see any of the game's seven different endings.
- In Story Mode, when the character set-up menu appears, your character will have a level of 200; you'll also have 200 bonus points to fully max out your strength, vitality, intelligence, mental powers, agility and luck ratings
- In Story Mode, a stage-select menu will appear after you choose your character.
- In Story Mode, you can refill your life points at any time by holding **X+Y+Z** and pressing **Up** (if you hold **X+Y+Z** and press **Down**, you'll die instantly.)
- In Story Mode, you can skip to different scenes using the following commands:

Hold **R+B** and press **START** to skip ahead three events
Hold **R+C** and press **START** to skip ahead four events
Hold **L+R** and press **START** to skip back one event
Hold **L+R+A** and press **START** to skip back two events
Hold **L+R+B** and press **START** to skip back three events
Hold **L+R+C** and press **START** to skip back four events

- In Vs. Mode, you can choose from any of 45 different characters, including all of the heroes and enemies from the whole game.
- In Story Mode and Vs. Mode, if you pause the game and tap the L button, you will see boxes drawn around the characters that show how the game's collision detection works; if an enemy touches the box, it registers a hit. If you pause and tap **L** a second time, the boxes will be three-dimensional Pause and tap **L** a third time to remove the boxes.
- If you have both the "Debug" and the "Next Exp. Disp." options turned on, the red-and-black meter in Story Mode will display your karma points instead of experience points.

To access all of the character portraits, you must play through the Arcade Mode without losing a single round or continuing; do this at the "Normal," "Hard" and "Arcade" difficulty settings to get all three portraits for each character.

Alternate Weapons

To access alternate weapons, you must first earn the third set of "Portraits" by beating the game in Arcade mode at the "Arcade" difficulty setting without continuing or losing a single round (as described above). Once you have access to the third set of portraits, enter one of the following simple codes at the character-select screen.

- For Yusaku, Nagi, Zaimoku, Lisa or Red Eye, highlight the character, hold **Left** on the D-pad and press **A** or **C**.
- For Joe, Tommy, Yoko, Kurosawa or Red Eye, highlight the character, hold **Right** on the D-pad and press **A** or **C**.

When the match starts, your character will be holding a funny weapon. (Zaimoku has a fish, Yusaku has a toy train, etc.)

Extra Difficulty Settings

Last Bronx uses the Saturn's internal memory to keep track of how many times you've turned the Saturn on with the *Last Bronx* disc inside. Once you've loaded the game 15 times, you'll find three new difficulty settings at the Options menu: Defense (in which the computer blocks a lot), Berserk (the computer goes crazy) and Judo (the computer throws a lot).

LAST GLADIATORS DIGITAL PINBALL

Hidden "Victors" Table

At the title screen, after the words "PRESS START BUTTON" appear, press **X, Y, Z, X, Y, Z, C, B, A, Up, Up, START**. You'll warp immediately to the "Victors" table, a small pinball machine which actually leads to the game credit sequence that plays when you beat the game. You'll only have a short time to play it before the credits roll, but hey, it's something. If you're some kind of nut who wants to watch the ending credits without playing the "Victors" table, use this code at the title screen instead: **C, B, A, A, B, C, Y, Z, X, Down, Down, START**.

Debug Menu

If you can read Japanese, you might get a bit more out of this cheat than the average American gamer. At the title screen—when the words "PRESS START BUTTON" appear—press **Up, Up, Down, Down, Left, Right, Left, Right, X, B, Z, R, START**. You'll be sent to a strange debugging menu with different windows of information. The only thing you can play with is the small window that says "CPK" (actually, it says "CPK • Player" in Japanese.) Move the arrow/cursor to the "Mount" button and press the **A** button; you'll get a list of items in the window above it. To see or hear an item, highlight it with the cursor and **A** button, then point to the "Play" button and press **A**. The items that start with the letters "CDDA" are the digital audio tracks from the CD, and the items that end with "CPK" are full-motion video scenes; most of the others will lock up the Saturn, as will the "CDDA" and "CPK" items as soon as they're done playing.

Cheat Mode

At the title screen, after the words "PRESS START BUTTON" appear, press **Up, Up, Up, Up, A, B, C, Down, Down, X, Y, Z, START**. You'll hear a sound to confirm the code. Now start the game; at any time during play (on any table), hold the **X** button and press **Up**, you'll see two sets of numbers appear in the bottom right corner of the screen. Change the number on the right by pressing **Up** or **Down** on the D-pad, then press the **Z** button to trigger one of the current pinball table's special modes; for example, on the "Gladiators" table, each the following modes can be activated by pressing **Z** when the corner number is set as follows:

00—Multiball
01—Roman Triumph
02—Retiarius
03—Bloody Arena (Two-Ball)
04—Chariot Races (Three-Ball)
05—Extra Ball Lit
06—Senator Mystery Lit
07—SPQR
08—Thracians
09—Empire
10—Gladiator Show

Experiment with the other tables to find out what each of the 11 numbers can trigger. The only limitation is that you can't trigger one mode if the results of another mode are still in effect. Also, the Saturn will crash after you run out of balls on any table with the cheat mode in place. Heh heh...sorry.

To remove the numbers from the screen, hold **X** and press **Down**; while the numbers are gone, hold **Y** and press **Up** to pause or unpause the game without obstructing the screen, or hold **Z** and press **Up** repeatedly to step through the animation one "frame" at a time.

Secret Scene

Last Gladiators uses the internal clock of the Saturn to play funny tricks on you. Assuming you have entered the date and time correctly at the Saturn's "System Settings" menu, you can see a behind-the-scenes video of the making of the game before the title screen appears if you load the game between 8:00 and 11:00 A.M. At any other time of day, you'll get the standard FMV introduction. If you want to watch this hidden scene at any other time, just change the Saturn's internal time clock at the "System Settings" menu and boot the game.

Set FINGER OF DEATH to "True" and you can destroy any target instantly during battle by holding the **L** and **R** buttons and pressing **B**. Be sure you have a ship targeted when you do this or you will destroy every ship in range, including your wingmen or even the Tiger's Claw itself.

Now, at the character-select screen in Versus Mode, you can choose Kull by moving the cursor to Crimson Glory and pressing **Right**. - High Abbot—"J RUBIN" JAN 6 1970
- Voodoo—"EVIL" JUN 6 1966
- Major Trouble—"BAD BOY" FEB 4 1908
- Black Dragon—"WYVERN" MAR 9 1927

Psychedelic World

Go to the NAMES option on the main menu and enter the name "PARANOID" and the birthday MAY 5 1975. Now go to the ARENA option where you'll find a new stage called "Cave." In this background, every frame of your character's animation will remain on the screen as you move, which makes for some freaky effects.

Secret Background

Go to the NAMES option and enter the name "TAJ MAHAL" and the birthday JAN 1 1901. Now go to the ARENA option where you'll find a new secret stage called "Garden."

Speed Code

Select the two-player "VS" mode. The player on the right should select a character, point the D-pad diagonally in the **Down/Right** position and also hold the **A**, **B**, **C** and **START** buttons. The left player should choose a character, point the D-pad diagonally in the **Up/Left** position and also hold the **L**, **R** and **START** buttons. Cheat Menu

To access a cheat menu, you need to reach the "New Game/Load Game/Continue" menu screen. (This screen will appear automatically if you have a saved game in memory; if you can't get there, the easiest thing to do is to fly the first mission and get killed. The "Continue" menu will appear after the "Funeral.") At the "Continue" menu, press and hold the **L** button, then press and hold the **P** button; you'll see the cursor cycling through the available options. Continue to hold those buttons down and press **A** while the word "Continue" is highlighted. You'll get a debug menu with tons of options. Some of them simply don't work ("Gameflow Flags," "Test Stream" and "Test SFX") and others will prevent you from returning to the game without restarting the machine (the words "C to exit" will disappear from the main menu). "Pick Mission" allows you to play any mission. "Play Movie" and "Play Inflight Movie" allow you to watch the game's FMV scenes. "Show Sprites" and "View Objects" let you see the items and backgrounds. If you choose "System Flags" and change the first two options to "False" and start the game, you can't be killed, you can't crash into any other ships and, when your weapons are locked on to an enemy, hold **X** and press the **A** button to instantly kill them with the "Finger of Death." You can return to the debug menu at any time by holding **L** and pressing **P**; you may need to do this during a mission to change the system flags.
